1. The subject-matter of independent claims 1 and 7 differs from the cited prior art in that it disclose an aqueous emulsion of polyvinylidene and an emulsifier used in coating a fresh product. Thus, the subject-matter of claims 1-11 meets the novelty requirements (Article 33(2) PCT).
2. In view of the technical problem to be solved (to provide an alternative coating for fresh products) and its unexpected solution (aqueous emulsion of polyvinylidene and an emulsifier), the subject-matter of claims 1-11 can be regarded as involving an inventive step (Article 33(3) PCT) over the any of the cited prior art documents, taken alone or in combination.
3. The subject-matter of claims 1-11 meets the requirements of Article 33(4) PCT because it is applicable in the food industry.

Further comments:

- a. The vague and imprecise statement in the description on page 7 ("...spirit and scope...") implies that the subject-matter for which protection is sought may be different to that defined by the claims, thereby resulting in lack of clarity of the claims (Article 6 PCT) when used to interpret them (see the PCT Guidelines III, 4.3a).
- b. The word "about" in present claims and in the description is unclear (Article 6 PCT and PCT Guidelines III-4.5).
